Please add a summary/explanation

One publication on Facebook and website (25 of July) on the training “Improve the knowledge of the Dahari’s team and its partners on the vegetative propagation techniques for indigenous forest species of the Comoros “

Organized by ICRAF, from 2 till 11 of July, using theoretically and in practical sessions. Twelve participants (7 men and 5 women) composed of Dahari’s field Supervisors, committees’ bodies and some local partners. The objective was to improve the knowledge of the Dahari’s team and its partners on the vegetative propagation techniques for indigenous forest species of the Comoros, and specifically give:

- introduction to agroforestry;
- establishment and management of a nursery
- propagation by seed germination;
- vegetative propagation; and
- tree integration and management
